DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Llewellyn (US patent Number 5374860) in view of Kurobe (US Publication Number 20050201230).

In regards to claim 11, Llewellyn discloses detection means for detecting information in a signal (fs) (Fig. 1, 'encoded read data'), comprising a chain (CHDL) of signal time delay elements (Figs. 1-5, element 'Delay Line Td' and 32), an input of the chain (CHDL) being coupled to receive the signal (fs) (Figs. 1 and 5, element 'Encoded Read Data' and 50); and combining means (CBMNS) (Fig. 5 Multiplexer A and Multiplexer B) having combining inputs coupled to signal taps of the chain (CHDL) (Fig. 5, elements 39-45), the number of the combining inputs and the positions of coupling of the combining inputs to the signal taps of the chain (CHDL) corresponding to the information in the signal (fs) (Column 4, lines 43-52; polarity of the signal). However, Llewellyn does not disclose a sample and hold circuit (SH) for generating said signal (fs).

In the same field of endeavor, Kurobe discloses a sample and hold circuit (SH) for generating said signal (fs) (Fig. 11, element g5). At the time of the invention it would

Art Unit: 2627

have been obvious to a person of ordinary skill in the art to modify the apparatus of detection means of Llewellyn to have sample and hold circuit as suggested by Kurobe. The motivation would have been to detect the wobble signal more accurately.

Allowable Subject Matter

Claims 1-10, the reason for allowance is the same as in the last office action.

Response to Arguments

Applicant's arguments with respect to claim 11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2627

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
